Gravitas

Gravitas is a Gravatar component for Appcelerator Titanium. Simple and easy way to load the Gravatar associated with an email address.

Released under the MIT. Please see licence in the project root folder for more information.

Usage

```
var Gravitas = require("modules/gravatar");

var win = Ti.UI.createWindow();
var image = Gravitas.createGravatar({
    email: "rob@bytespider.eu",
    defaultStyle: Gravitas.GRAVITAR_DEFAULT_RETRO,
    size: 256,
    rating: Gravitas.GRAVITAR_RATING_PG
});

win.add(image);
win.open();
```

Methods

createGravatar

options

- email - [string] the email address of the user
- defaultStyle - [string] the style of default images when the user email doesn't exist (*default images styles constant*)
- rating - [string] the rating of the image to display (*image ratings constant*)
- size - [int] size of the image to load
- ext - [bool] whether to include the .jpg extension (not usually needed)
- defaultImage - [string] url or path to the default image

Constants

```
// Default image styles
Gravitas.DEFAULT_STYLE_404           // returns 404 response
Gravitas.DEFAULT_STYLE_OUTLINE       // portrait outline
Gravitas.DEFAULT_STYLE_GEOMETRIC     // geometric image (default)
Gravitas.DEFAULT_STYLE_MONSTER       // monsters
Gravitas.DEFAULT_STYLE_FACES         // cartoon faces
Gravitas.DEFAULT_STYLE_RETRO         // 8bit style image
Gravitas.DEFAULT_STYLE_CUSTOM        // will use the image you supply in defaultImage

Gravitas.DEFAULT_STYLE_ROBOHASH      // robohash.org generated default

// Image ratings
Gravitas.RATING_G                    // Allow G rated images or better (default)
Gravitas.RATING_PG                   // Allow PG rated images or better
Gravitas.RATING_R                    // Allow R rated images or better
Gravitas.RATING_X                    // Allow X rated images or better
```
